### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schoenbrun in view of Yocco. Schoenbrun shows arm loops 3,B and 2;A, and a drag grip 10, but does not teach his harness being made from a single length of strapping. Yocco shows a drag harness wherein his arm loops and drag grip is made from a single length of strapping. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the arm loops and drag grip of Schoenbrun form a single length of strapping, as taught by Yocco, to facilitate manufacturing.

Claim 2 and 11/2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schoenbrun and Yocco, as applied to claim 1 above, and further in view of either Martusciello or Campbell. Both Martusciello at 50 and Campbell at 14 show drag grips comprising a fixed length loop. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Schoenbrun to comprise with a drag grip, as taught by either Martusciello or Campbell, for maintaining a grip of a user of his harness.
